

THE 2020 - LONG BEACH LANDSCAPE DESIGN • BUILD • MAINTAIN • SUPPLY EXPO

As a vendor, we like to see qualified professionals and this show certainly provided the opportunity to meet new (and existing) customers.

Testimonies from 2019

If there's a landscape show, seminar, or expo to attend, it's this one! We'll attend and many decision makers interested in your product... a must show!

The most efficient trade show to make contact with clients you otherwise wouldn't find or have the time to find them!

This is an excellent place to come learn and see cutting edge technology on display.

Our booth was very busy both Wednesday and Thursday.

Green Touch Industries/TrailerRacks.com has been attending the Long Beach Landscape Expo since day one and we will continue to attend and showcase our products.

Educational Conference

In 2019 there were 57 CEU-approved seminars and outdoor workshops with a record 1,683 seminar seats sold.

TLE provides needed and insightful information that business owners, superintendents and their critical staff can apply in the field tomorrow.

"The show organizers have gone to great lengths over the years to build a rock solid education track. Many of the presentations have Continuing Education Units (CEU) attached to them, a must for many of us in the profession."

- Nicholas Staddon
