Anchor
RETAINING WALL SYSTEMS

What You Will Learn:
Level I Segmental Retaining Wall (SRW) Educational Program

- Understand history and advantages of Segmental Retaining Walls
- Understand SRW units, soils, and geosynthetics
- Learn minimum industry standards for SRW installation
- Understand effective equipment and tool selection, and equipment management
- Understand effective job planning and site preparation

Who Should Attend?

- Design/Build Landscape Contractors
- SRW System Installers
- SRW Installer Foreman, Estimators and Owners

What is Provided?

- Student Manual
- All course materials, including NCMA Industry Guidelines for SRW Installation
- Level I SRW Certification Exam
- Lunch
- Exam (80% passing REQUIRED for certificate)

Seminar Time

On-site registration begins at 7:30 a.m.
The program begins at 8:00 a.m.
and ends at 5:00 p.m.

Seminar Instructors

All instructors have successfully completed the NCMA certification and are approved to deliver the segmental retaining wall (SRW) installation modules. Course instructors include engineers, wall installation contractors and manufacturing representatives who are experienced in the design and construction of SRWs. Our instructors’ collective experiences provide guests with a strong understanding about the system components of a segmental retaining wall structure. Industry established best practices as well as real world construction techniques will be discussed. Instructors will offer insight into design considerations for a better understanding of the technical side of wall engineering. Instructors will also advise attendees practical and intuitive approaches to the construction of segmental retaining walls.

NCMA

The National Concrete Masonry Association (NCMA) is the national trade association representing producers and suppliers in the concrete masonry industry. Founded in 1918, NCMA represents block producers throughout the United States and Canada and serves international members throughout the world. Member companies produce standard block, architectural block, concrete brick, segmental retaining wall units, articulated concrete block and other specialty products. www.ncma.org

Pavestone Company

Pavestone Company, the nation's largest producer of interlocking concrete pave stones and segmental retaining walls provides the strength of a national company with local customer service and expertise.

Now in their 25th year of operation, Pavestone Company has established its position as the dominant player in pave stones, retaining walls, erosion control systems and precast architectural site furnishings. Our 17 manufacturing branches provide local distribution to landscape architects, contractors, installers, home builders, and developers. Pavestone is committed to offering the greatest selection of in-demand quality products and continually introduce new shapes, color and textures each year. Our dedicated account representatives provide training, professional certification, and marketing support as well as unmatched customer service. www.pavestone.com

Anchor Wall Systems, Inc.

Based in Minneapolis, MN, Anchor Wall Systems, Inc. is a designer and licensor of flexible, cost-effective, high-quality concrete retaining wall solutions for a wide variety of commercial, municipal and residential landscaping projects worldwide. Manufactured to the highest quality standards, Anchor brand products are beautiful, economical and long-lasting. They provide an attractive, environmentally sound alternative to landscape timbers and rock walls and help control soil movement and erosion. The patented pinless system of integral locator lips, or locators, makes for fast and easy installation, and a beautiful, long-lasting finished product. www.anchorwall.com
