E-Z TRENCH®
Quality Equipment, Quality Results

*TP56sdi*

IMPACT ON YOUR BUSINESS: Dig a trench 13" deep and 2 ½" wide at a rate of 20 feet per minute!

Customers love how simple it is to use and how quickly it trenches. It is small enough to fit into standard gates and weighs only 250 pounds. The model EZ9100 has a 6.5hp Honda with a "wet clutch" transmission, which virtually eliminates the frequent maintenance associated with belt driven equipment. Heavy-duty replaceable carbide cutting bits will slice right through hard soils and even roots.

The TP56sdi digs a trench, installs drip tubing and actually backfills the trench. Powered by a Honda GX160 engine, it is reliable and rugged. Carbide tipped cutting bits dig through hard soils and roots. Only weighs 100 pounds. See it work at www.eztrench.com/sdi.
